

ABSTRACT OF THE DISCLOSURE

A preferred method for coupling an RF signal between an RF device and test equipment includes the steps of: (1) providing an RF device; (2) at least partially surrounding a first portion of the antenna of the RF device with a tuning material; and (3) coupling an RF signal to a second portion of the antenna, the second portion of the antenna being disposed between the first portion and the RF device body. Systems and devices also are provided.
